

Medication Reconciliation

Medication Reconciliation is a formal process in which healthcare providers partner with patients and their families to ensure accurate and complete medication information transfer at interfaces of care. This includes admission and discharge from a hospital or changes in care setting, service, or level of care. **It is the most accurate list of all medications a patient is actually taking.**

"What Is Medication Reconciliation?" *What Is Medication Reconciliation? - Medication Reconciliation: A Learning Guide.* N.p., n.d. Web. 12 Mar. 2017.

Medication reconciliation is a 3-step process:

- **Verify** – Collect an accurate medication list
- **Clarify** – Clarify any questions about drug/dose/frequency
- **Reconcile** – Communicate with physician about any identified medication questions or concerns

Goal of Medication Reconciliation

The ultimate goal of medication reconciliation is to prevent adverse drug events and harm to the patient.

Medication Reconciliation at SOC & ROC
