

OASIS ITEM
<p>(M1600) Has this patient been treated for a Urinary Tract Infection in the past 14 days?</p> <p> <input type="checkbox"/> 0 - No <input type="checkbox"/> 1 - Yes <input type="checkbox"/> NA - Patient on prophylactic treatment <input type="checkbox"/> UK - Unknown </p>
ITEM INTENT
Identifies treatment of urinary tract infection during the past 14 days.
TIME POINTS ITEM(S) COMPLETED
Start of care Resumption of care Discharge from agency – not to inpatient facility
RESPONSE—SPECIFIC INSTRUCTIONS
<ul style="list-style-type: none"> The term “past fourteen days” is the two-week period immediately preceding the start/resumption of care or discharge. This means that for purposes of counting the 14-day period, the date of admission is day 0 and the day immediately prior to the date of admission is day 1. For example, if the patient’s SOC date is August 20, any treatment for a UTI occurring on or after August 6 would be considered. Unknown is not an option at discharge from agency. Select Response 0 – No, if patient has not been treated for a UTI within the past two weeks, including if the patient had symptoms of a UTI or a positive culture for which the physician did not prescribe treatment, or the treatment ended more than 14 days ago. Select Response 1 – Yes, when the patient has been prescribed an antibiotic within the past 14 days specifically for a confirmed or suspected UTI. Select Response 1 – Yes, if the patient is on prophylactic treatment <u>and</u> develops a UTI. Select Response NA – if the patient is on prophylactic treatment to prevent UTIs.
