

Achieving Excellence in Consulting & Coding

Questions & Answers from March 26, 2014

Session 4

Q1. Why is Gentamicin in the excluded list? Isn't this given IV?

A2 Yes, Gentamicin can be given IV which would be included in this question. The reference given during the presentation was for gentamicin given as a bladder mucomist. Any irrigation or infusion of a bladder is excluded in this item. The route of delivery determines the coverage for M1030.

Q2: Slide 29-what about OASIS walk and 24hrs prior-if they were not in recliner with pillows and were SOB? How would this be 0

A2: The OASIS Walk is a phrase registered by Fazzi Associates for Watch Assess Listen Know. If the patient was occasionally sleeping in the recliner and the environment was not modified on a regular basis, then this would change the answer. The example given on the slide was referenced from C4 Q113.3.
