

# iPad

## Installation Instructions

1. Find a safe place to plug the Ipad in at patient's home. Ipad should be powered on and remain plugged in so the battery stays charged.
2. Push the home button twice, you will see the HRS icon in the upper left hand side of the screen. Tap the HRS icon and the patient will see a "White/Home Screen". This is where the patient wants to be to accept an incoming video call.
3. Do a test call with the patient so they can see what a call coming in looks like and how to answer the incoming call.
4. Fill out the "IPad installation" and "Patient consent" forms and leave one copy in the patient's home. If the patient is Covid presumptive/positive only take patient's copy into home. Fill out the second copy outside of the home.

### **Virtual Video Ipad Hotline 978-552-4125**

#### **Please connect to patient's WIFI if available:**

- Tap on the "Settings" icon (grey gear).
- Tap on "WIFI" (the available networks will appear).
- Select the patient's home WIFI network.
- Enter the patient's WIFI password and tap on "Join".
